

PAVITHRAN P

Senior Product Designer | Enterprise UX

ppavithran@outlook.com | +91 805 664 4772 | Chennai | [LinkedIn](#) | [Portfolio](#)

Senior Product Designer with close to **5 years of experience** turning complex enterprise architectures into intuitive digital products. Proven track record of spearheading GenAI adoption, establishing scalable design systems and bridging engineering constraints with business goals to reduce operational friction and drive measurable cost savings.

Skills

Product Design & Interaction: Product Design, Interaction Design, Enterprise UX, UX Strategy, User Flows, Information Architecture, Journey Mapping, Wireframing, Prototyping, Accessibility, Complex Workflow Design

Research & Product Discovery: User Research, User Interviews, Usability Testing, Functionality Testing, Persona Development, Visual Audits, Gap Analysis, Requirements Gathering, A/B Testing, AI-Assisted Research, Insight Synthesis

Enterprise Systems & Delivery: Design Systems, Micro Frontend (MFE) Architecture, Reusable Components, Scalable Design Patterns, Design Governance, Developer Handoff, Cross-Functional Delivery

Conversational AI & Emerging Tech: Conversational UX, Human-AI Interaction, GenAI Product Experiences, AI Prompting, Claude, Gemini, ChatGPT, Microsoft Copilot, NotebookLM

Leadership & Collaboration: Stakeholder Management, Workshop Facilitation, Mentorship, Storytelling, Design Reviews, Team Enablement, Sprint Accountability

Tools: Figma, Figma Make, Adobe XD, Illustrator, Photoshop, Adobe Premiere, Miro, Jira, Confluence

Experience

Verizon - Sr. Product Designer Aug 2024 – July 2026
Telecom | Conversational AI

- Led user research and core workflow design for a next-gen, **A2UI**-enhanced conversational app for call center agents, establishing standardized interaction patterns and a rigorous VQA process to significantly reduce UI fragmentation and engineering technical debt.
- Directed the UX strategy and end-to-end redesign of the service module by introducing Micro Frontend (MFE) architecture, driving workflow efficiencies aimed at a 7.5% reduction in overall call volume.
- Designed 3 reusable POS components and converted legacy modals into inline tabs, minimizing agent cognitive load and task-switching friction to support an 80% issue resolution rate within three days.
- Championed enterprise-wide AI integration by leading hands-on training for Claude, Gemini, and Copilot across product teams.
- Designed and delivered a 6-week micro-interactions learning series to improve design capability while maintaining 100% sprint accountability on flagship initiatives.

Cognizant - Experience Designer Apr 2022 – Aug 2024
Banking | E-commerce | Insurance | Information services

- Designed the Employee Center Reimagine portal to support and scale across an internal global workforce of over 357,600 employees.
- Integrated tailored GenAI solutions into project proposals and client-facing demos, directly contributing to the acquisition of new enterprise client engagements.
- Partnered with the Chennai design studio lead to spearhead internal projects, taking full ownership of end-to-end delivery from initial scoping and wire-framing through to developer handoff.
- Executed comprehensive user research, usability and functionality testing to surface critical, actionable insights and resolve usability issues prior to product releases.

Recognition & Awards

Verizon Spotlight Award - Personal Commitment	May 2026
VCG CXO India Award Winner - Outstanding contribution beyond core project delivery	Apr 2026
Verizon Spotlight Award - Customer Experience	Jun 2025

Education

Master of Design (M.Des), Industrial Design - VIT Vellore - 8.47 CGPA May 2020 – Jun 2022
